

Kia E-Niro 150kW 4+ 64kWh 5dr Auto | Jan 2021
4+ WITH HEAT PUMP, SUNROOF, FULL KIA SERVICE HISTORY

£19,345

January 2021 first registered. One keeper from new. All-electric KIA e-Niro 4+ 64kWh battery with 150kW electric motor combined with 1-spd automatic. This car features as standard a Heat Pump system. Maximum onboard Fast charge is 11kW (AC 3 Phase). Graphite Grey metallic paint. Mileage is 32,265 miles. Co2 0g/km. FULL KIA MIAN FRANCHISE DEALER SERVICE HISTORY: Service stamp at 31,037 miles on 12/01/2024; Service stamp at 25,971 miles on 09/02/2023; Service stamp at 16,757 miles on 09/02/2022. *Using Home charge AC single-phase up to 7.2kW takes 9hrs 35mins (0% to 100%). 50kW DC Rapid charger takes 1hr 15mins (0% to 80%). When this car was brand new the single charge battery range quoted for this car was 282 miles (100% battery charge). **Please note due to battery degradation this figure may not be achieved. The condition of this car is excellent. On the exterior body panels we observe just a few very minor blemishes. On the OSR bumper corner lower section there are a few light surface scores. There are a few very minor stone chips on the NSF bumper section - we have improved these. There are a few very light surface scores on the rear bumper lip section. These are all very minor blemishes that you will have to look closely at to observe. The 17 diamond finish alloy wheels are each in perfect condition without any obvious visual marks. All four tyres are premium brand Michellin. OSR, NSF and OSF tyres have 3.50mm tread. The NSR 5.00mm tread. With tyre inflation kit. The interior is in very good condition, and has been kept to a high standard of care. There are no signs of excess wear and tear on the black leather upholstery. There are no obvious significant marks on the interior cabin trim panels or plastics. Non smokers car. 2x remote keys are present. Type 2 to

As this car has a full KIA main franchise dealer service history, the balance of KIA's 7-Year/100,000 mile warranty applies subject to continued manufacturer recommended routine servicing. *Charging times will depend on various factors, including temperature, state of the battery, state of and capabilities of the charging unit and power supply. Actual charging time will vary depending on the level of charge in the battery, as well as environmental conditions. Charging times will also be affected by the charging curve for example once charging passes 80%, charging will slow to protect the battery's longevity. The availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery. **Lithium-ion batteries, of the type used in most electric vehicles (including KIA electric vehicles) have a restricted lifespan. Battery capacity will reduce over time, with use and charging. Reduction in battery capacity will affect the performance of the vehicle, including the range achievable, and may impact resale value. New car performance figures (including battery capacity and range) may be provided for the purposes of comparison between vehicles. You should not rely on new car performance figures (including battery capacity and range), in relation to used vehicles with older batteries, as they will not reflect used vehicle performance in the real world. For further information on battery degradation/preservation and KIA's battery warranty visit
