

TESLA Model X 245Kw 75Kwh Dual Motor 5Dr Auto | Jul 2017

£ 500 OFF ADVERTISED PRICE

£24,499

Like all Tesla vehicles, the Model X is powered entirely by electricity. It comes with a choice of battery packs that offer varying ranges. The Model X offers impressive acceleration and performance due to the electric drivetrain. The Model X has a distinctive design with its falcon-wing doors, which open vertically instead of swinging outwards. This feature not only adds to the futuristic appeal of the vehicle but also makes it easier to enter and exit in tight spaces. The interior of the Model X is spacious and luxurious, seating up to seven adults comfortably in three rows. The second and third-row seats can be folded down to create additional cargo space when needed. Tesla vehicles are known for their advanced technology features, and the Model X is no exception. It comes equipped with a large touchscreen display in the center console, which controls various functions of the vehicle including navigation, media playback, climate control, and more. The Model X also features Tesla's Autopilot system, which offers advanced driver-assistance capabilities. The Model X offers impressive performance for an SUV, with different variants available with varying levels of acceleration and range. Some variants of the Model X can accelerate from 0 to 60 mph in under 3 seconds, which is remarkable for a vehicle of its size and weight. Tesla places a strong emphasis on safety, and the Model X is designed with this in mind. It has received top safety ratings from various testing organizations and comes equipped with a suite of safety features including automatic emergency braking, collision avoidance systems, and more.
