Reg:	P5146831

This is a brand new and unregistered KIA EV6 GT-LINE S 77.4kWh 226bhp (168kW) RWD 1-speed finished in Midnight Black metallic paint worth £675, which is included in our price. Featuring a 77.4kWh battery combined with a single 168kW electric motor powering the rear axle. The EV6 has a multi-charging system for both 400V (more mainstream charging systems) and 800V (high-speed charging systems). A 'RAPID DC' 50kW charge takes 73 minutes from 10% to 80%. Charging using a home charger wall point 230V 16amp 7.2kW AC charge takes 11hrs to 100%. For non-RAPID charging (including home charging and 'FAST' charging systems up to 22kW) the charging rate is limited to 11kW by the EV6's standard 11kW on-board charger. Single charge range is quoted at 313 miles. Available to purchase with a 2.9% APR Personal Contract Purchase credit plan funded through KIA Finance and includes £2,000 finance deposit contribution paid by KIA Finance. With this credit plan ownership is possible once all regular monthly repayments and the final guaranteed deferred purchase sum are paid to the credit lender, KIA Finance. With this credit arrangement you can make lump sum overpayments or settle the credit balance at anytime. Example based on 9,000 miles pa - other annual mileage options and up front deposit options are available. This car is MY23 model year. Howard Abraham Motors Ltd is authorised and regulated by the FCA (Financial Conduct Authority). Our Firm Ref No is 306228. Our status is not independent, we have agreed commercial terms with a limited number of credit providers. Finance subject to status. Terms and conditions apply. Applicant must be over 18 years of age. A guarantee may be required. Written quotations available on request from Kia Motor Finance, 3 Princess Way, Redhill, Surrey, RH1 1SR. Offers apply to vehicles ordered and registered from

02-April 2024 to 01-July 2024. Prices correct at time published and may be subject to change. £2,000 Finance deposit contribution only available in conjunction with 2.9% APR PCP (Personal Contract Purchase) credit purchase plan. Charging times will depend on various factors, including temperature, state of the battery, state of and capabilities of the charging unit and power supply. Actual charging time will vary depending on the level of charge in the battery, as well as environmental conditions. Charging times will also be affected by the charging curve for example once charging passes 80%, charging will slow to protect the battery's longevity. The availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery. Lithium-ion batteries, of the type used in most electric vehicles (including KIA electric vehicles) have a restricted lifespan. Battery capacity will reduce over time, with use and charging. Reduction in battery capacity will affect the performance of the vehicle, including the range achievable, and may impact resale value. New car performance figures (including battery capacity and range) may be provided for the purposes of comparison between vehicles. You should not rely on new car performance figures (including battery capacity and range), in relation to used vehicles with older batteries, as they will not reflect used vehicle performance in the real world. For further information on battery degradation/preservation and KIA's battery warranty visit
